

MARMA

Innovation in Marble Design

MARMA Innovation in Marble - launches first collection at Maison & Objet 2016

January 2016

MARMA - Innovation in Marble will proudly be exhibiting for the first time at Maison Objet Paris, from 22-26 January.

MARMA - Innovation in Marble, is the next step of a family owned business in Greece with over 55 years experience in the marble industry. MARMA - Innovation in Marble is focusing on the production of high quality handmade products out of solid Greek marble offering a range of innovative design products for portable devices. The product is all about a creative synergy that combines contemporary design using traditional marble treatment.

Our purpose is comfort and everyday life progression. With solid marble and solid oak wood MARMA - Innovation in Marble creates a volcanic combination that allows us to experience and own distinctive handmade products. The collection consists of the iPhone stand and the iPad stand, both made by solid handcrafted materials. Each piece is a unique product with its own marble waves giving a sense of a bespoke stand for each owner.

We are creating products that will add a unique value to your everyday life.
